

Our telescopic covers and protective components will reduce the failure rate of your machines essentially.

GOGAN was founded in 1985 and is specialized in production of protective components for the moving parts of machine tools. Being focused on the development, production and sale of telescopic covers, cable carriers, guide-way wipers and many other components for machine tools, it belongs to the most considerable companies both on the Indian and Asian market.

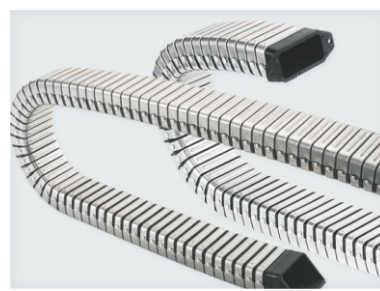

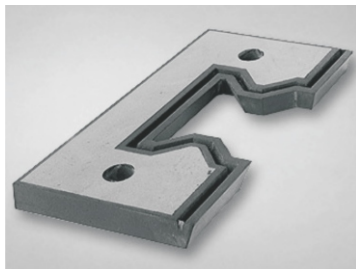

Telescopic Covers

Traditional form of covering guide ways, spindles, shafts, columns and other sensitive parts of machine tools.

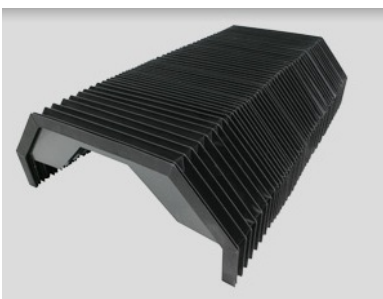

- Standard telescopic covers
- Complex set-ups of built-in covers
- Design, construction, production and service of not only telescopic covers, but also complex built-in and outside covers
- For the telescopic covers we developed a conventional damping unit up to 60 m/min. (segment energy)
- We design covers with mechanism for a fully controlled motion up to 120 m/min.

Guide-Way Wipers

Cable Carriers

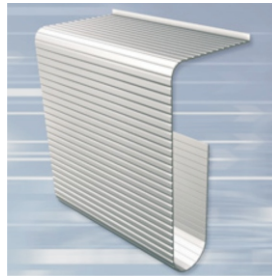

Bellows

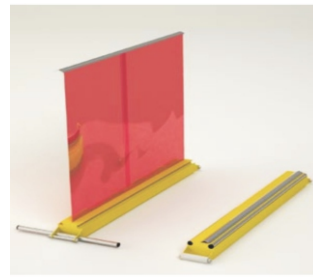

Rolling Covers

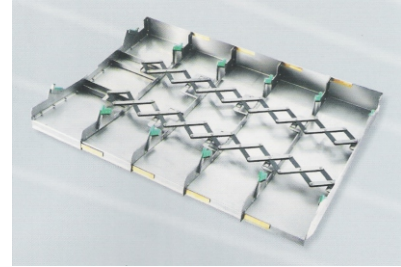

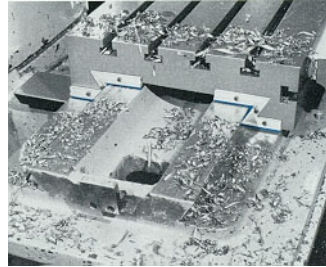

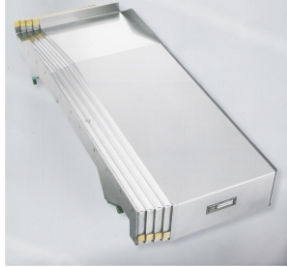

Apron Covers

Weld Screens

Telescopic Springs

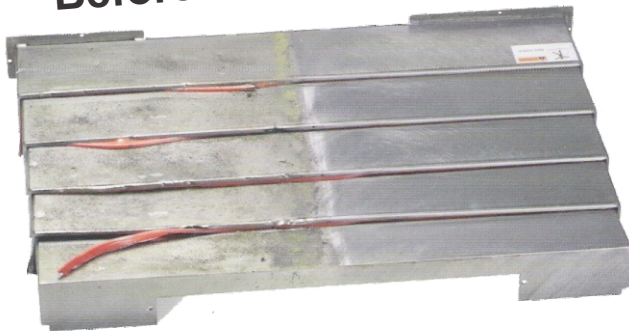

Custom manufacturing

GOGAN offers its machinery to other companies with similar manufacturing program. Our company produces components from various kinds of metal material, using the most modern technology. We design & develop machine enclosures as per our customer's requirement.

Before After

Repair of Steel Telescopic Covers

- For repair, service or replacement of all brands of steel telescopic covers, the Gogan cover repair centre is fast, cost effective and reliable.
- For repairs done on all brands of telescopic box covers.
- Technicians with highly skilled experience.
- 120 day warranty on parts and labour.
- Full line of standard cover accessories available from stock.

Safety Guards for Machine Tools

Protection screen for lathes, made of steel, Polycarbonate or laminated glass, with safety microswitch.

We offer

- short-run production as well as mass production
- flexible response to customer requirements
- complete technological service
- highest quality products for favourable prices

Metalwork

- Custom sheet metal machining
- Top punching, forming and laser cutting technology
- Customized sheet metal fabrication
